THINQ LEARNING MANAGER ADMINISTRATOR MODULE

LOGGING ON

From the THINQ Learning Manager (TLM) Administrator logon page:

1. Enter your given user name in the **Username** field.
2. Enter your given password in the **Password** field.
3. Click Logon to display the main menu.

Call the TrainingServer Support Desk at 1-555-555-9461 and select option 5 for additional support, if needed.

NAVIGATING THE MENU

- Click ⊞ or the name of the link to expand the menu for a section. See the expanded **Event Management** view on the right.
- Click any link to edit or view tables and forms for the selected region.
- Click ⊟ or the name of the link to collapse the menu.

The bar at the top of the screen displays options for manipulating Learning the TLM.

- shows or hides the menu. Hiding the menu expands the main view.
- Help opens the online help function.
- Log Off exits the system.
- << Back displays the previous screen.
- Locations / Courses / Instructors / Vendors / Skills displays the names of the screens and record names that have been accessed recently. Selecting from this view drop-down menu allows the user to quickly return to any previously displayed screen.

THE TABLE VIEW

Information is organized and displayed in tables in THINQ Learning Manager.

RECORDSET MENU

Allows you to move quickly through records in the table without having to scroll through each record.

Displays the first ten records.

Displays the previous ten records.

Enter the record number in the **Recordset** field and click Go to move the view directly to a specific range of ten records. For example, entering "15" would return records 11 – 20.

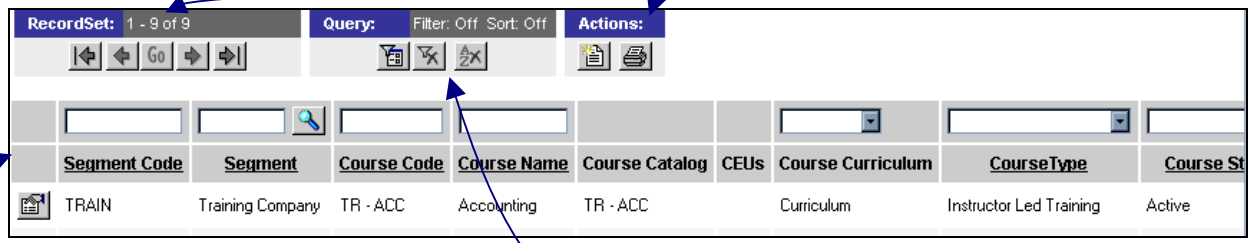

ACTIONS MENU

Allows you to perform high-level system functions.

Displays a blank/new record form.

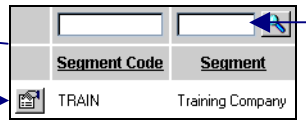

Creates a Rich Text Format (.rtf) file of the current view which can be printed or imported into other applications for reporting purposes.

SCREEN FUNCTIONS

Allows you to open detailed information and change the information displayed on the screen.

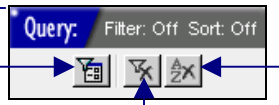

Click to display the form view for the record to the right.

Enter selection criteria in any of the column heading fields, then click (for more information, see *Query Menu*) to limit the view to records meeting those criteria.

Click any column heading (e.g., Course Code) to sort the records by items in that column.

QUERY MENU

Allows you to organize the data within a table.

Filters out all but those records fitting the selection criteria entered below.

Removes the filter.

Removes any sort. For more information, see *Screen Functions.*

THE FORM VIEW

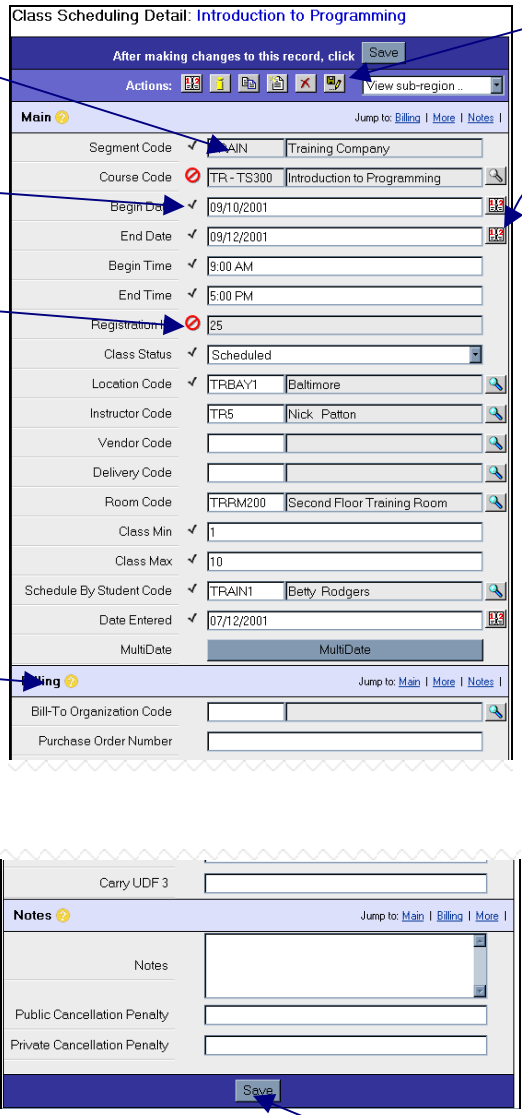

The Form view refers to the view presented when creating, editing, or viewing a single record in THINQ Learning Manager Administrator module.

Grayed-out boxes indicate fields that cannot be edited.

The ☑ symbol indicates that the field is required.

⊘ Indicates that the field cannot be edited.

The ? symbol displays the TLM Administrator Help.

Action Buttons

The **Action** buttons on Form Views may not always be the same. Below are some examples of Form View **Action** buttons.

- Use the **Audit** button to view the name of the last person who modified the record. The audit stamp provides the name, date, and exact time the record was last changed.
- Use the **New** button to create a new record.
- Use the **Delete** button to delete the current record.
- Use the **Save** button to save the current record.

Opens a calendar to allow you to select a date. Dates also can be typed directly in the field. When in the **Class Scheduling** screen, this button opens the multidate functionality.

Saves any changes to the form. Either Save or at the top of the screen can be used to save.

WORKING WITH REPORTS | DEFINITIONS

Standard Reports pull information from one or more tables and present it in a printable format.

STANDARD REPORTS

You can create pre-set, standard reports in Event Management.

To generate a standard report:

1. Click Get Report to the right of the report name you want to generate.
   - A blank form for the selected report displays.
2. Complete the form with criteria needed to generate your report.
   - Fields marked with ☑ are required. You must complete the field for the report to be generated.
3. Click Report to open the Crystal Report Viewer.
   - **The Report Information Needed** prompt may display requiring you to enter the criteria for your report.
4. Complete the **Report Information Needed** prompt by clicking Next > until you reach the final prompt screen.
5. Click Finish to display your report.

DEFINITIONS

CAREER PLANNING – area of TLM where administrative tasks such as creating jobs, associating skills, and adding new employees are performed.

COURSE ADMINISTRATION – area of TLM where administrative tasks such as creating courses instructors are performed.

CREATE NEW – opens a blank form to create a new record (e.g., to add a new instructor). The Create New option is available from both the table and form views.

EVENT MANAGEMENT – area of TLM where management tasks such as scheduling classes and creating rosters are performed.

FILTER – tool in the table view for limiting the records displayed.

FORM – The view used to edit a single record.

QUICKLIST – list of available values for a field in a form. Click to display the available values.

RECORD – basic information building block in TLM. A record is one complete set of data that can be created or edited in a single form view (e.g., an individual job or student profile).

REGION – main elements in TLM in which related functions are performed. Region information is displayed in tables in Learning Manager (e.g., the **Skills** tab displays a comprehensive list of job skills in a web table**)**.

SUB-REGION – an element within the application that is created when a function is performed by interrelating two or more Learning Manager regions (e.g., *skills* and *assign* are both sub-regions of the **Job** module).

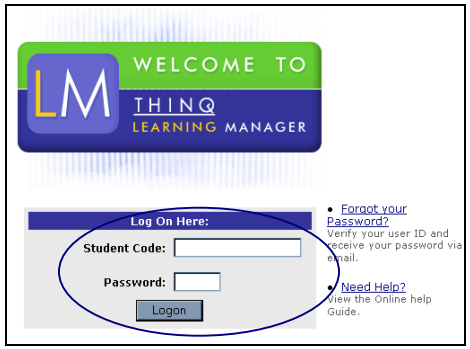

View sub-region ..

TABLE – a view to represent a collection of records. Regions and Sub-regions are represented as tables. For more information, see *The Table View.*

THINQ LEARNING MANAGER STUDENT MODULE

The Student module allows you to access and manage your learning. You are able to view and work with the course catalog, class schedules, current enrollments, skills assessment, profiles, transcripts, and personal data.

LOGGING ON

From the THINQ Learning Manager (TLM) Student Module Login page:

1. Enter your user name (to be determined by your company) in the **Student Code** field.
   - The **Username** and **Password** fields are **not** case sensitive.
2. Enter your password in the **Password** field.
   - The password may be letters, numbers or a combination of both.
3. Click Logon to display the main menu.

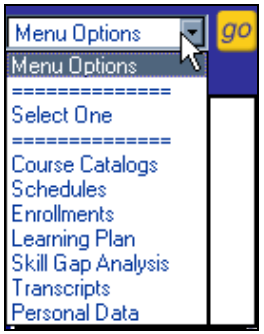

USING HELP

You can access online help by clicking Need Help? from the right of the logon screen. The Help displays the Online Help Guide. In addition, if you experience problems logging in, you can click Forgot Your Password? to verify your user ID and receive your password via email

NAVIGATING THE MENU

The bar at the top of the screen displays options for navigating the TLM Student module.

- Click the Menu Options drop-down menu to display the menu options. You can also access these sections and a description of each from the list that appears at the bottom of the screen.

The menu at the top right of the screen provides several additional navigation options:

- Home- Returns you to the main page
- Help- Displays the Online Help Guide, your first resource for trouble-shooting and problem resolution.
- Feedback- Provides an email link to the THINQ Customer Support, allowing you to report any issues you may encounter.
- LogOff- Ends your TLM session. It is important to log off before exiting so your user ID is no longer active.

In addition to the main pull-down menus, the TLM also allows direct searches for specific courses. Simply enter the course name in the field provided and click go.

Several external web-links are provided as a quick reference source. These links are accessed through the top menu bar. They consist of sites that are set-up by your administrator. Each link will open in a new window.

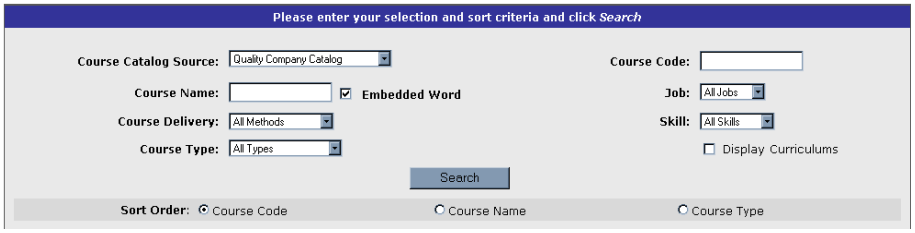

TASKS

Searching for a Course, Searching for a Schedule of Classes, Reviewing Your Enrollments, Viewing Your Transcripts, Updating Your Personal Data, Working in Your Learning Plan, Working with Skill Gap Analysis

SELECTION AND SEARCH FUNCTIONS

The various tasks in TLM provide the capability for you to search for specific information.

For example, the **Course Catalog** offers several fields (*Course Catalog Source, Course Code, Course Name, Course Delivery type, Course Type, Job, Skill*) which you can use to narrow down a search for a specific Course.

If you were to enter 'Boon' in the **Course Code** search field, and click Search, the system would return a list of classes that match that keyword:

Course Code	Course Name	Course Type
BOON-C2	Introduction to Programming	Audio
BOON-C2IAMACOUR	Technical Writing	Audio

You can search on as many of the fields at once as you would like to narrow your search. This functionality is available in all of the tasks in TLM with varying search field options appropriate to the individual tasks.

SEARCHING FOR A COURSE IN A CATALOG

The Course Catalogs represents all training offered internally by your company and select THINQ providers (e.g., NetG, CompUSA, etc).

The **Schedule of Classes** web page allows you to query the TLM for available scheduled classes based on a specified search criteria. After you have performed a search, the system displays a list of classes that fit your criteria.

To enroll in a class, click the Class ID.
For a class summary, click the Course Name.
To view Location and Room detail, Click the Location.

Class ID	Course Code	Course Name	Date/Time	Location
68	DE3636	Buying Options	09/03/2001 09:00 AM 09/24/2001 11:30 AM	Loyola Business Center
69	DE4445	Energy Valuation Models	09/10/2001 10:00 AM 09/24/2001 02:00 PM	Dallas Facility

Clicking on the desired course name allows you to view the class summary page, which contains information about a class such as date/time, cost, status, credits (CEU's), number of students currently enrolled, class minimum/maximum, objectives, and descriptions. From this page, you can Make Request for Training (waiting list) Purchase this class from THINQ, or Return to Course Catalogs.

To add yourself to a waitlist, simply click the **Class ID** of class of interest. Making a training request puts your name onto a waiting list for the course. A waiting list record does not mean you are scheduled to attend the class - it simply says that you would like to have the training as close as possible to the date you specify.

SEARCHING FOR A SCHEDULE OF CLASSES

The **Schedule of Classes** web page allows you to find available scheduled classes based on a specified search. After you have performed a search, the system displays a list of schedules that fit your criteria.

Class ID	Course Code	Course Name	Date/Time	Location
16	BOON-OTTER101	HTML & Basics of Web Development	06/25/2001 08:00 AM 07/25/2001 04:00 PM	Harbor Confr Room

To enroll in a class, click the **Class ID** of the class of your interest.

Clicking on the desired location allows you to view the location summary page which contains information such as the location code, address, and room information.

A successful enrollment in a class means that you are now on the Roster to attend that scheduled class on the specified dates and times.

To get onto a class roster you must have fulfilled all prerequisites, have no schedule conflicts, not be on a current roster for the same class, and the class roster cannot be full.

Once the **Class Enrollment** page has opened, you will notice that TLM has already included all necessary information for you. You will only need to insert a different email address (if necessary).

Click Proceed to confirm the enrollment and complete the necessary billing information.

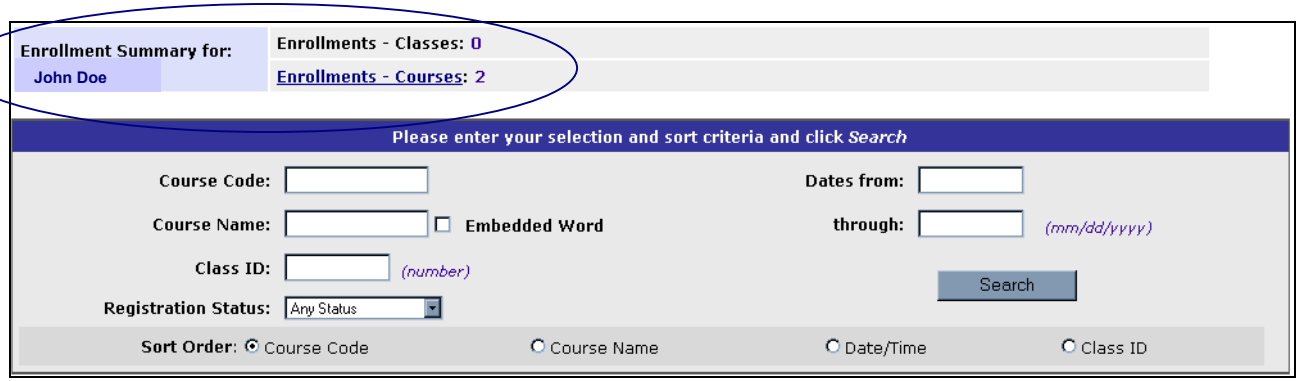

TASKS

Searching for a Course, Searching for a Schedule of Classes, **Reviewing Your Enrollments**, Viewing Your Transcripts, Updating Your Personal Data, Working in Your Learning Plan, Working with Skill Gap Analysis

REVIEWING YOUR ENROLLMENTS

The Enrollments area is useful for finding out what enrollments, waiting lists, and roster records you presently have as well as for making changes to those records.

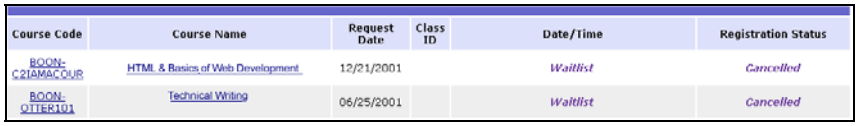

Your current enrollments, waiting list, and roster record numbers are automatically displayed at the top of this screen. Click any item to view the specific information or click Search to generate a complete list of records.

The **Classes** link reflects actual, scheduled learning sessions while **Courses** displays bodies of knowledge that you would like to pursue (e.g., knowledge areas you may be currently waitlisted for)

The **Enrollments** web page allows you to find out your current enrollments based on a specified search. After you have performed a search, the system displays a list of enrollments that fit your criteria.

UPDATING AN ENROLLMENT

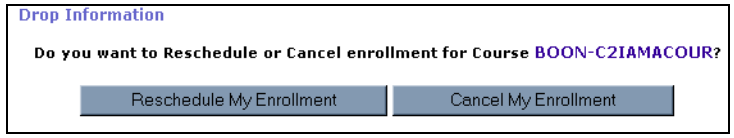

Course Code	Course Name	Request Date	Class ID	Date/Time	Registration Status
BOON-C2IAMACOUR	HTML & Basics of Web Development	12/21/2001		*Waitlist*	*Cancelled*
BOON-OTTER101	Technical Writing	06/25/2001		*Waitlist*	*Cancelled*

From this view, you can:

- Drop a class or update your enrollment status by clicking the **Course Code**.
- Display information about a course by clicking the **Course Name**.

To drop or reschedule your enrollment, click Drop to Waitlist at the bottom of the **Update Enrollment** page. You will be taken to the **Drop Information** page.

Click Reschedule My Enrollment to request a different date to take a current course or click Cancel My Enrollment to be removed from that course waiting list altogether.

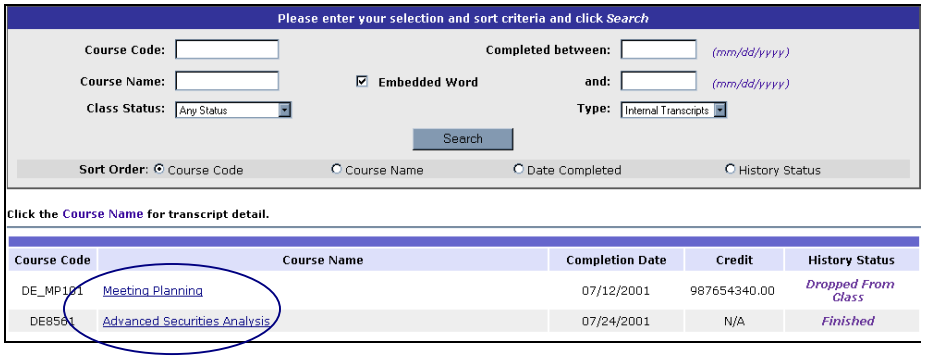

TASKS

Searching for a Course, Searching for a Schedule of Classes, Reviewing Your Enrollments, **Viewing Your Transcripts,** **Updating Your Personal Data,** Working in Your Learning Plan, Working with Skill Gap Analysis

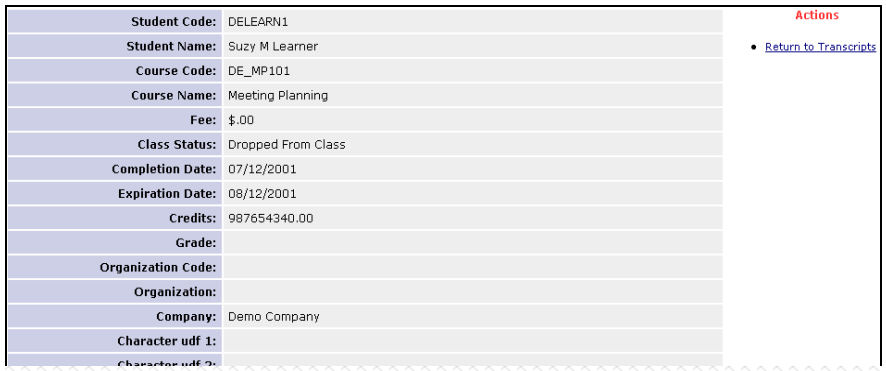

VIEWING YOUR TRANSCRIPTS

TLM records all of the training that takes place for a student in student transcripts. Transcripts reflect completed, partially completed, or attempted participation in a course or class. The transcript identifies the student, course, date attempted or completed, attendance fee, the outcome of the curriculum, course, or program, and the grade for the training.

The **Transcripts** web page allows you to find your current enrollments based on a specified search. Based on your search query, the TLM returns a list of transcripts (see below).

Clicking on any of these transcripts takes you to the **Transcript Detail** page.

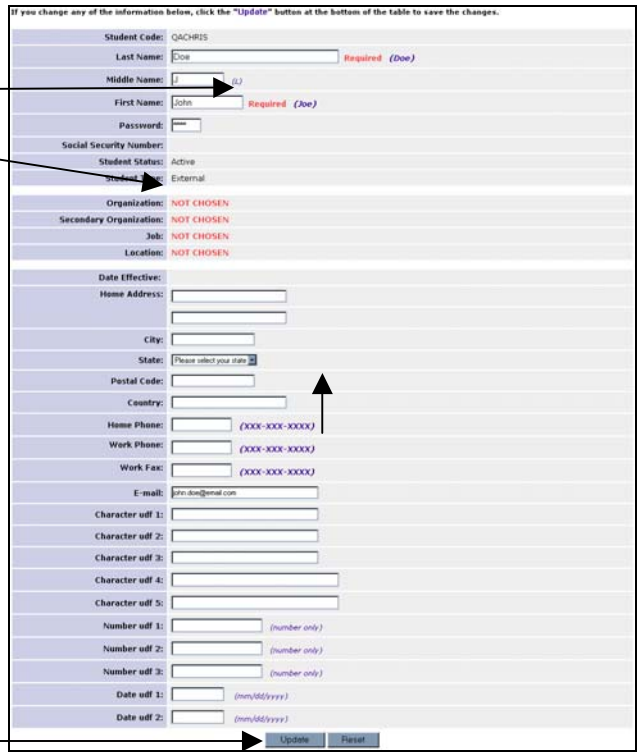

The **Transcripts Detail** page displays the transcript information stored for each student transcript record. All of the information is read-only for this page.

UPDATING YOUR PERSONAL DATA

This option allows you to validate and change personal information that is stored in the TLM such as your phone number, mailing address, and e-mail address.

Items in RED indicate a required field or that the option is not available (NOT CHOSEN).

When you are finished making all the appropriate field changes, click Update to update the table and save your changes or click Reset to clear your entries and start over.

Once you have updated all of the information, TLM sends you to a verification page with a confirmation message. At this point, you can click the **Return to Personal Information** hyperlink to review the new changes.

TASKS

Searching for a Course, Searching for a Schedule of Classes, Reviewing Your Enrollments, Viewing Your Transcripts, Updating Your Personal Data**, Working in Your Learning Plan**, Working with Skill Gap Analysis

WORKING IN YOUR LEARNING PLAN

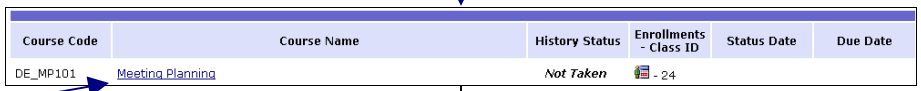

To find out what kind of training or courses are recommended for you, click Learning Plan. You can view and launch course requirements assigned to your job/activity profiles. If there are any courses assigned to your skill profile, **Skill Name** displays as a table heading instead of **Course Name**.

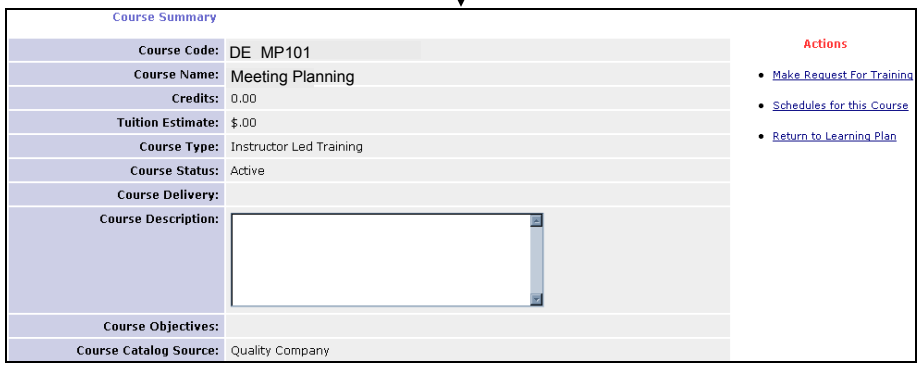

Click the drop-down box to select the profile plan of your choice and then click Search. If there are any courses assigned to your profile, a **Course Name**, **Status,** and **Status Date** appears in a table format.

You can perform a search for a specific profile using the **History Status** pull-down menu (e.g., Cancelled, Browsed, Completed, etc.).

Click the **Course Name** to display a Course Summary. For Skill Profiles, click the **Skill Name** to see a list of that will help develop this skill.

From this page, you can perform the following options:

- **Make Request for Training** – Use this link to request to be put on the waitlist for the selected course roster.
- **Schedules for this Course** (if there are classes scheduled) - Use this link to view the dates the selected course is offered from which you can get on the roster.
- **Return to Learning Plan-** This link will return you to the main page of the **Learning Plan.**

TASKS

Searching for a Course, Searching for a Schedule of Classes, Reviewing Your Enrollments, Viewing Your Transcripts, Updating Your Personal Data, Working in Your Learning Plan, **Working with Skill Gap Analysis**

WORKING WITH SKILL GAP ANALYSIS

The **Skill Gap Analysis** page allows you to assess your skills. You may make adjustments to current skills in your skill inventory, as well as add assessments for any skills that you have acquired.

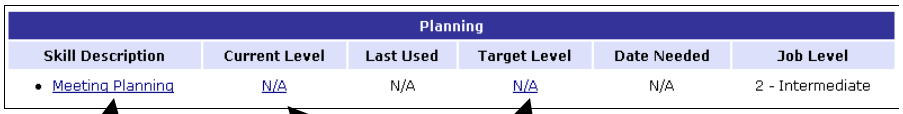

Viewing and updating skills can be achieved in a few different ways:

- by selecting your primary and secondary job descriptions (if skills are defined for your job)
- by choosing to view/update general skills divided into Job or Skill categories and jobs defined for your organization.
- Click the 'All Skill Categories' hyperlink to view a list of every skill sorted by its respective skill category. Once at the **Skills by Category** page, click the 'skill category' hyperlink to see the list of skills in a table format.

Updating/Viewing Skills for Primary/Secondary/ All Jobs

From the list, click on a **Primary Job** or **Secondary Job** hyperlink to display the associated skills for that job:

Planning

Skill Description	Current Level	Last Used	Target Level	Date Needed	Job Level
Meeting Planning	N/A	N/A	N/A	N/A	2 - Intermediate

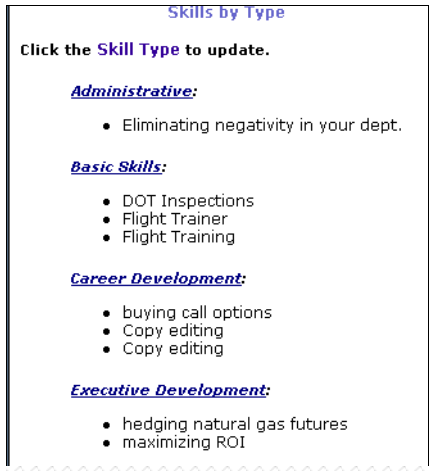

To display a list of courses that will build skill, click the Skill Description.

To change your current skill level, click the Current Level or the Target Level.

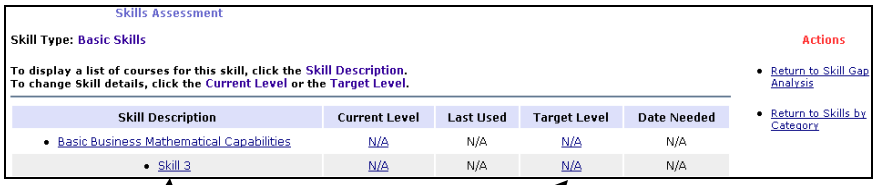

If skills are not assigned to your job description, you will receive the message: "Sorry, there are currently no skills to assess."

Updating/Viewing Skills in the All Skills Categories section

Click the All Skill Types hyperlink to display a list of all defined skill types:

Click on a specific skill type (e.g., **Basic Skills**) to display a list of all skills associated with the jobs listed:

Skills Assessment

Skill Type: Basic Skills

To display a list of courses for this skill, click the Skill Description.
To change Skill details, click the Current Level or the Target Level.

Actions
- Return to Skill Gap Analysis
- Return to Skills by Category

Skill Description	Current Level	Last Used	Target Level	Date Needed
Basic Business Mathematical Capabilities	N/A	N/A	N/A	N/A
Skill 3	N/A	N/A	N/A	N/A

To display a list of courses for this skill, click the **Skill Description.**

To change Skill details, click the **Current Level** or the **Target Level.**
