# Purpose and Scope

This playbook defines the processes, best practices, and procedures for demonstrations (demos) and [REDACTED]. While it does not provide an all-encompassing guide for each team (as they have their own additional workflows) this document serves as a guide for the strategy, planning, and executing the basic tasks of a successful demo. Each onsite demonstration experience varies, depending on the audience, but there are some connecting themes. These are typically defined by [REDACTED] or hardware advances, new software features and vehicle behavior, newly-introduced demo [REDACTED], and guest comfort.

# Demo Basics

To understand what is required and involved in demos, it is important to understand some of the foundational terms and concepts.

## Demos vs. [REDACTED]

Staff and stakeholders often do not understand the difference between a demo and a ride-along:

### *The Demo*

A demo is an overall, on-site event provided for external stakeholders and generally includes [REDACTED]. The demo allows these stakeholders to observe and participate in a showcase of [REDACTED]'s technology and targeted discussions. External stakeholders are non-[REDACTED] employees and are a wide range of audiences (customer, prospective/current partner, press, auditors, financial leaders, etc.).

Another activity often included in a demo is a technical showcase that consists of an in-person demonstration of a portion or combination of a particular product, feature, or operational flow that is separate from [REDACTED]. Examples of a technical showcase might be a demonstration of how [REDACTED] is used to perform the [REDACTED] process, or a [REDACTED] demonstration of how the [REDACTED]performs [REDACTED].

## *[REDACTED]*

[REDACTED]provide visitors with a live experience of our technology along with the chance to observe [REDACTED] procedures and operations. This is one of the most effective experiences for boosting confidence in [REDACTED], understanding the realities of the [REDACTED], and a proof point that our technology is real.

While a demo usually includes [REDACTED], the [REDACTED] activity specifically refers to the time when a visitor (such as an external stakeholder) is a [REDACTED] during a demonstration of the [REDACTED]. Typically, this [REDACTED]is on [REDACTED], and the external party is accompanied by a [REDACTED] [REDACTED]. The [REDACTED] explains and answers questions regarding the [REDACTED] and its behavior in its environment.

**IMPORTANT:** [REDACTED] for public-[REDACTED] [REDACTED]s must be commissioned for public [REDACTED]s and thoroughly tested and vetted to meet demo performance requirements.

### In-[REDACTED] Roles

All [REDACTED]s, per [REDACTED] require two [REDACTED] members which are the [REDACTED] and field operations specialist (FOS) in the front seats and allow for a [REDACTED] and one visitor in the rear seats (at the back of the cab. The following lists the responsibilities and requirements for each person in the [REDACTED].

[REDACTED] serve as a critical contributor to the [REDACTED] experience as they provide context and information to the visitor while allowing the [REDACTED] to focus on their own roles and the [REDACTED]. The [REDACTED] also contributes to strategic goals by providing focused one-to-one conversations with the visitor.

[redacted]

**NOTE:** Refer to the following resources in the [REDACTED] site:

- General [REDACTED] talking points here [REDACTED LINK]
- IFTD and FOS training document here [REDACTED LINK]

| | Responsible for | Requirements |
|---|---|---|
| IFTD | • Operation and monitoring the vehicle<br>• Safety of the [REDACTED] and others on the [REDACTED]<br>• [REDACTED]intro script | • Over one-year of [REDACTED] experience<br>• Spotless behavioral record<br>• Completion of demo training with an on-site refresher |
| FOS | • Safety testing<br>• Reinforcing safety processes<br>• [REDACTED] intro script<br>• [REDACTED] setup | • Over one-year of [REDACTED]experience<br>• Spotless behavioral record<br>• Completion of demo training with an on-site refresher |
| [REDACTED] | • Explaining safety procedures and setting expectations to the visitor<br>• Escorting visitor to and from [REDACTED]<br>• Engaging with visitor and answering questions<br>• Support safety procedures | • Approval of Commercialization team or audience stakeholder<br>• Thorough knowledge and ability to speak about [REDACTED] technology, business, and strategy<br>• Completed training as [REDACTED] role and the talking points<br>• Must be press trained for visitors who are members of the press |

## *Static [REDACTED] Demos*

Static demos are showcases of the [REDACTED] to show additional platforms in various situations, based on availability and goals of the visit:

- [REDACTED] parked in the Dallas-Fort Worth ([REDACTED]) garage
- A display [REDACTED] at a large event, such as an [REDACTED]
- A display [REDACTED] at a local event, such as a [REDACTED]visit or collegiate event

**Static [REDACTED]**

[REDACTED]

[REDACTED]

## *Other Experiences*

In addition to the demos as previously described, [REDACTED] offers additional experiences: [REDACTED] and [REDACTED].

### The [REDACTED]Experience

The [REDACTED] provides the opportunity to discuss [REDACTED], and have a fun experience.

- Review the simulator script here [REDACTED LINK].
- Use this link [REDACTED LINK] to request a [REDACTED] experience via this link [REDACTED LINK].

**IMPORTANT:**

- If time is limited, it is a good idea to set expectations ahead of time with visitors and make sure they understand that the [REDACTED] is not a [REDACTED].
- Because [REDACTED]can be a concern, it is not recommended to have [REDACTED] and [REDACTED] experiences in rapid succession.

### [REDACTED]

Currently, the [REDACTED] process is scripted to be a stand-alone technology showcase, with audiences observing from the outside to get a better understanding of the connection with between the [REDACTED] and [REDACTED] tools (such as [REDACTED] and [REDACTED] tools).

Refer to the most current script for more information about [REDACTED].

# Benefits of On-site Demos

[REDACTED] chooses to offer on-site demos (as previously defined) to interested external stakeholders because being on-site affords definite advantages to [REDACTED] business:

First, successful on-site visits and live-[REDACTED] demos have proven to influence early pilot adoption next-steps, positive placement in the news media, and collect valuable feedback on development and requirements.

Second, bringing stakeholders on-site for a focused, targeted product experience provides [REDACTED] with a home-field advantage with regard to relationship building and efficient methods of forwarding goals: showcasing [REDACTED]'s technology to, and receiving feedback from, key stakeholders and decision-makers is critical to ensuring we have the funding, public confidence, and future customer and regulatory buy-in that allows us to launch a profitable product at scale or full capacity.

In summary, the advantages of [REDACTED]'s on-site demo program are that they:

- provide demonstrable proof points that reflect [REDACTED]'s operational and technical proficiency.
- forward strategic relationship building with customer, partnership, and [REDACTED]. These in-person sessions allow for deep dive discussions and provide a more impactful avenue to educate and receive feedback over static presentations.
- build trust and confidence in [REDACTED].
- promote pilot and commercial adoption.
- satisfy [REDACTED] stakeholder requests.
- raise company industry standing.

# Demo Audiences

Audiences are defined by tiers which specify the audience's significance and priority. Based on the audience tier, specific strategies are utilized to optimize the impact of each demo.

## *Audience Tiers*

Audience Tiers are utilized to convey to all internal support groups the significance and priority of the visitors coming in and set the general level of expectation for performance based on established objective and key Results (OKRs) and preparation. The specifics of each tier (as shown in the following table) quickly communicates expectations, especially in situations where the identification of audience members may need to remain confidential.

| Level | Priority | Audience type examples | Expected performance | Experience includes |
|---|---|---|---|---|
| Tier 1 | Top | • [REDACTED] | **Best:** [REDACTED] | • [REDACTED] |
| Tier 2 | High | • [REDACTED] | **Great:** [REDACTED] | • [REDACTED] |
| Tier 3 | Medium | • [REDACTED] | **Good:** *most* OKRs in green [REDACTED] | • Available subject matter [REDACTED] |
| Tier 4 | Internal | • [REDACTED] | **Normal:** [REDACTED] | • [REDACTED] |

* Anything "in [REDACTED] range" indicates that the project is [REDACTED].

## *Audience Strategy*

It is critical to develop the demo audience strategy. The presentation must target the specific needs, knowledge, and goals of each audience as a "one-size-fits-all" demo is ineffective as each audience type has different priorities. For maximum impact, the strategy must be based on thorough audience research, customization of the narrative, and adjustment of the level of technical detail.

### Audience Goals

Audience agendas must correlate with audience goals, coordinated with the stakeholders for that external audience. In general, visit goals fit into the following categories:

| Goal Category | Purpose of Goal |
|---|---|
| **Relationship** | [REDACTED] |
| **Experience** | [REDACTED] |
| **Education** | [REDACTED] |
| **Follow up** | [REDACTED] |

## Audience Background

When developing an audience strategy, consider the background of the audience to define what messages and experience need to be included in a demo.

| Background | Explain the… |
|---|---|
| **New to [REDACTED]** | Baseline concepts of [REDACTED], understanding of our place in the industry, and gain confidence that our technology is real |
| **Returning, previous relationship** | Proof points of progress without regression |
| **Industry familiarity** | Differentiators and similarities with competitors |

## Audience Stakeholders

We need intro here

| Area | Stakeholder |
|---|---|
| **Press** | Director of External Communications, Corporate Comms/Marketing |
| **Customer groups** | Customer & Partnerships Management Director, Corporate Strategy |
| **Safety & Regulatory** | Senior Vice President (SVP), Safety and Regulatory, Corporate Executive |
| **[REDACTED] [REDACTED] audiences, board members, stakeholders** | Chief of Staff to Chief Executive Officer (CEO), Corporate Executive |

# Demo Event Overview

Every event has variations based on audience. In general, these variations may include:

- Location: [REDACTED] site (if [REDACTED] are included)
- Length: one half to one day site visit per group (with an optional dinner before or after)
- Activities:
  - Site walkthrough with a focus on [REDACTED] and [REDACTED]
  - Introductory presentations
  - [REDACTED], testing, and safety overview
  - [REDACTED]s
    - Two in parallel on one or more of the [REDACTED] below
    - Maximum of eight in a single day unless special permissions are obtained
  - Lunch at the facility
  - [REDACTED]
    - Technical overview with one or more static displays [REDACTED] shown
  - Focused discussions and presentations specific to audience
- Other Activities
  - [REDACTED] presentation and participation (time allowing)
  - Deep dive of [REDACTED], [REDACTED], or other [REDACTED] tools (such as [REDACTED], [REDACTED], [REDACTED])

## Number of [REDACTED]

Typical demo events require three dedicated [REDACTED]: two [REDACTED] run in parallel and one to be up and ready to swap out in case of hardware, software, or [REDACTED] issues, keeping the schedule intact.

**IMPORTANT:**

- Set expectations for safety, operations, and company overview
- Demo [REDACTED] must have a [REDACTED].
- Schedule presentations in a similar slot as [REDACTED].
- Refer to Scheduling Details [REDACTED LINK].

# [REDACTED] Overview

There are several main demos [REDACTED] used at [REDACTED]. These [REDACTED] can be mixed and matched but must have up to date.

## *[REDACTED]*

| [REDACTED] Name | Features | Best for |
|---|---|---|
| [REDACTED] | • [REDACTED] | • [REDACTED] |
| [REDACTED] | • [REDACTED] | • [REDACTED] |
| [REDACTED] | • [REDACTED] | • [REDACTED] |

**Platform**

The [REDACTED] are the only platforms as of this writing that can provide [REDACTED]on [REDACTED].

Other Platforms include:

- [REDACTED]
- [REDACTED]

# Demo Request and Planning Process

Initial demo requests may come to the program lead via the official form or other communication. In order to be considered and planned, it must have gone through the appropriate approval processes and be entered into the request form.

## Scheduling Best Practices

It is essential to review these guidelines to ensure appropriate and timely scheduling of demos and preferred [REDACTED].

- **Include buffer**
  - Schedule [REDACTED]
  - Allow [REDACTED]
  - Remember [REDACTED]
- **Be consistent as much as possible**
  - Schedule [REDACTED]
  - While [REDACTED]
- **Schedule** [REDACTED]
  - Demos are [REDACTED]
  - Consider [REDACTED]:
    - [REDACTED]
    - [REDACTED]
- **Consider** [REDACTED]
  - [REDACTED]
  - [REDACTED]

# Lead Time Best Practices and Points of Contact

[REDACTED]

| | | | |
|---|---|---|---|
| [redacted] | [redacted] | [redacted] | [redacted] |
| [redacted] | [redacted] | [redacted] | [redacted] |
| [redacted] | [redacted] | [redacted] | [redacted] |
| [redacted] | [redacted] | [redacted] | [redacted] |
| [redacted] | [redacted] | [redacted] | [redacted] |
| [redacted] | [redacted] | [redacted] | [redacted] |
| [redacted] | [redacted] | [redacted] | [redacted] |
| [redacted] | [redacted] | [redacted] | [redacted] |

# Intake and Approvals Flow

Tier 1 and 2 demos (refer to Audience Tiers on page 6) must also go through the product request process

# Considerations for Approval

Each submitted request undergoes a careful approval process and evaluation that includes the following considerations.

| Consideration | Criteria |
|---|---|
| **Demo feasibility** | • [REDACTED] |
| **Business value** | • [REDACTED] |
| **Engineering support** | • [REDACTED] |

# Considerations for Rejection

While most requests are approved, there are certain circumstances that can lead to rejection.

| Consideration | Explanation |
|---|---|
| **[REDACTED]** | [REDACTED] |
| **[REDACTED]** | [REDACTED] |
| **[REDACTED]** | [REDACTED] |
| **[REDACTED]** | [REDACTED] |

# Demo Preparation Tasks

This section of the document explains what tasks need to be completed in preparation for a demo.

## Communicating with the Visitor Group

- A PoC should be assigned to the visitor group. [REDACTED]
- Set Expectations
- Send an email (refer to Appendix B) to visitors to make them aware of all expectations for their visit:
- Once approvals have been obtained, be sure to do the following tasks:
    - [REDACTED]
    - [REDACTED]
    - [REDACTED]
- Prior to the day of the [REDACTED], be sure visitors are made aware of the following:
    - [REDACTED]
    - [REDACTED]
    - [REDACTED]
    - [REDACTED]

# Demo Program Manager Preparations

**NOTE:** These preparations are specific to the demo program manager only. Other teams have their own preparation tasks.

## *Communicate with Audience Stakeholders and Commercial Leadership*

- Provide weekly updates on any risks, decision-making needs, and/or additional options for the planned agenda.
- Ensure presenters and [REDACTED] are scheduled; ensure backups are available for both.
- As soon as possible, communicate issues that may impact performance or the demo experience, such as [REDACTED], construction, platform issues; provide potential solutions and owners for each.

## *Communication with all teams*

- One week prior, ensure that the schedule for [REDACTED]s is on the Demo SharePoint site, allowing for appropriate [REDACTED] and practice [REDACTED] training.
- During weekly meetings, share updates and changes, both verbally and via SharePoint docs & forms.
- For specific problem solving or on-site logistics, schedule smaller group meetings.

## *Communication with [REDACTED] & Engineering*

- As soon as possible, provide any demo [REDACTED] preferences (as needed).
- Consult with the [REDACTED] team leads regarding any preparatory performance, risks, and/or bugs.
- Schedule refresher training with demo [REDACTED] as necessary. Once a quarter, give a refresher training presentation for all

## *Retrospective Meetings (Retros)*

- If possible, schedule a retro meeting with demo participants immediately after the event to gather feedback on what went well, what could have gone better, and next steps/action items.
- Provide post-event retrospective to audience members, [REDACTED] leads, and any other impacted staff.
- Provide quarterly summaries of all events to VP, Commercialization for their own reporting purposes.

# Day of Demo Flow Management

Use the following flow management guidelines to ensure the smooth, coordinated progression of the demo processes from start to finish for the day of any demo.

## *Maintain Constant Communication*

- Use the [REDACTED] Slack channel to concisely communicate critical information (such as when visitors are headed to [REDACTED], status updates, etc.) to [REDACTED], On [REDACTED] Test team, [REDACTED], and any other appropriate other support groups.
- Determine PoC in the presenter/meeting groups to slack individually with information on schedule updates.
- Share any information needed with [REDACTED].
- Check in on weather, traffic patterns, and other circumstances that might impact the demo to ensure there are no delays.

## *Visitor Preparations*

- Arrive at least 90min-1hr before visitors to check on the demo status and make and necessary adjustments to ensure the planned schedule and distro as needed.
- From prep [REDACTED], get status updates such as which [REDACTED] are primary and any construction or [REDACTED] changes.
- Provide [REDACTED] participants with any schedule changes.
- Provide [REDACTED] with information on [REDACTED], their [REDACTED], their [REDACTED] visitors, and any last-minute situations on the [REDACTED] to speak to. Solidify the plans for transferring visitors.
- Ensure presentation setup, [REDACTED] [REDACTED] setup & other videos/screens ready to go.

## *Visitor Arrival*

Ensure visitors:

- receive safety vests, have signed waivers (if needed), and have the appropriate meal information;
- understand that [REDACTED] does not allow the taking of photos inside the facility or inside the [REDACTED], while photos outside of the [REDACTED] or facility are allowed; and
- receive the [REDACTED] and safety briefing overview and script.

## *At the [REDACTED]*

- At the beginning of each [REDACTED], determine which [REDACTED] are in.
- Before escorting visitors out to the [REDACTED], confirm that the [REDACTED] and [REDACTED] are ready to go before [REDACTED].
- Escort the visitor(s) and [REDACTED](s) to the [REDACTED].
- Check in with [REDACTED]as [REDACTED] are occurring, make note of any [REDACTED] or situations that presenters may need to address. Communicate them with your PoC.

## *At the End of the [REDACTED]*

- Alert the [REDACTED] regarding when the [REDACTED] are [REDACTED].
- [REDACTED].
- Ask the visitor about how the [REDACTED] went and if the [REDACTED] made the appropriate decisions. Make note of any visitor responses, questions, or concerns.
- Inform the visitor and [REDACTED] where to proceed next.
- Check in with [REDACTED] for any need for breaks or on [REDACTED] or [REDACTED] situations to be aware of.
- Confirm the estimated time and [REDACTED] of the next group (visitors and [REDACTED]).

# Performance OKRs

Intro…

## Goals

Based on historical performance of acceptable demos, baseline targets have been identified. Target performance measures outlined below.

Goal ranges are reported using the red, amber, green (RAG) system to indicate status:

- **Green:** goal has been met
- **Amber (yellow):** improvement is needed
- **Red:** goal is not yet met

| | Objective | Key Results | Target | | |
|---|---|---|---|---|---|
| | | | R | A | G |
| 1 | **Majority of the target demo [REDACTED] is [REDACTED] with [REDACTED]** | Percent of the traveled distance the [REDACTED] was engaged on a viable [REDACTED] by target demo software<br>**NOTE:** Averaged across each demo event. | **<8 5%** | **85-92%** | **≥92%** |
| | | Number of average [REDACTED] are at or below target threshold<br>(Excluding [REDACTED] and averaged across demo event) | **>4** | **>2-4** | **≤2** |
| | | Number of [REDACTED] during a demo event<br>(Excluding known base vehicle issues) | **>1** | **1** | **0** |
| | | Number of average [REDACTED]*<br>(Averaged across demo event) | **1-2** | **>2** | **0** |
| 2 | **Demo software performance is consistent and predictable** | Percent of [REDACTED] above the threshold of 3 [REDACTED]<br>(Across demo event) | **>15%** | **11-15%** | **≤10%** |
| | | Within the 10th percentile for [REDACTED]<br>(Across demo event) | **≥5** | **4** | **≤3** |
| | | Number of instances unexplainable behavior or unknown component, hardware, or platform failures<br>(Across demo event)** | **>3** | **1-2** | **0** |

| | Objective | Key Results | Target | | |
|---|---|---|---|---|---|
| | | | R | A | G |
| 3 | **[REDACTED] follows best practices for nominal operation of [REDACTED]** | Instances of noticeable [REDACTED] or [REDACTED] (as reported by [REDACTED] or visitor)*** | **>2** | **1-2** | **0** |
| | | Audience scale of 1-5 that 'the [REDACTED] made the [REDACTED].' (average per group visit). | **<4** | **4** | **4.5-5** |

*Mitigations are in place to reduce the impact of and recovery from [REDACTED].

# Appendices

# Appendix A: Points of Contact List

These are points of contact (currently as of July 12, 2024) for specific topics or areas in the program. The list is likely not comprehensive and is in no particular order.

| Topic | PoC(s) | Communications |
|---|---|---|
| **[REDACTED]** | • [REDACTED]<br>• System Engineer (for other engineering. requests) | Exchange info during quarterly planning, lead [REDACTED] as needed, clarify support needs. |
| **[REDACTED]** | • [REDACTED]<br>• [REDACTED] | Keep informed on [REDACTED]. |
| **Safety** | • [REDACTED]<br>• [REDACTED] | Connect if there are questions on safety restrictions, [REDACTED]. |
| **[REDACTED]** | • [REDACTED]<br>• [REDACTED] | Keep informed and support with platform delivery, events, etc. |
| **[REDACTED]** | • [REDACTED]<br>• [REDACTED] | Inform on any planned site visits or events in [REDACTED] that involve a [REDACTED] |
| **Platform Resources** | [REDACTED] | Inform or request ASAP when a certain platform is needed. |
| **[REDACTED]** | • [REDACTED]<br>• [REDACTED] | Inform on [REDACTED] issues and future strategy. |
| **Product Tier 1or2 demo request** | • [REDACTED] | Inform on updates whether to go-live or otherwise<br>Building & maintaining product request form for tier 1 or 2 demos – |

## On Site

| Topic | PoC(s) | Notes |
|---|---|---|
| **Site and Resources** | [REDACTED] | Keep informed on requests for demos, events, and [REDACTED] resource needs. |
| **ORT Mgmt** | [REDACTED] | Contact for [REDACTED] support on demo and prep days or for advice on other engineering resources. |
| **Live [REDACTED] test support** | [REDACTED] | Contact for assistance with connection to live [REDACTED]s, [REDACTED], and monitoring |
| **Site Management and event support** | • [REDACTED]<br>• [REDACTED]<br>• [REDACTED] | Include in event planning as a communication and organization [REDACTED], contact for connections with [REDACTED] catering, transportation, miscellaneous activities. |
| **[REDACTED]** | • [REDACTED]<br>• [REDACTED]<br>• [REDACTED] | Contact for [REDACTED] scheduling, on-site support for other [REDACTED]-related activities, and live updates. |

# Appendix B: Example Email

Use the following format for the email you send to visitors about their upcoming demo at [REDACTED].

*Dear [Visitor name]*

*The team at [REDACTED] is looking forward to your visit to our [REDACTED facility on [date]. Our current agenda runs from X:00am - X:30pm MT with lunch provided.*

*Your visit to our site will include a tour of our facilities and [REDACTED, a presentation on [REDACTED] testing and commercialization approach, and opportunities to discuss legal and regulatory collaboration and contributions. Select members of your group will be able to participate in a [REDACTED] to experience our [REDACTED] semi-[REDACTED] [REDACTED]s.*

*Please review the following information and let us know if you have any questions or concerns:*

***Site address:*** *[REDACTED*

***Parking instructions:*** *Enter the open gate in front of the [REDACTED] building. 3 visitor parking spots are located directly next to the building, on the east side. Parking spots are also available in the large lot near the gate, which will be visible upon entering.*

[redacted]

*In the meantime, you are welcome to call or text me when you are in town if you need assistance or have questions.*

*Sincerely,*

*Name*

*Title*

*Contact Information*

# Appendix C: Demo Resources and Links

The following resources and links are noted within the text on previous page but have been listed here for convenience.

## Demo SharePoint

- All detailed demo schedules should be put into the documents folder, under a folder labeled with the corresponding month and year.
- For ease of communication, this SharePoint site is located [REDACTED LINK] and is accessible to all [REDACTED].

## Intake and Planning

- Demo request form [REDACTED LINK] for submitting demo requests
- Demo intake for tracking and use at meetings [REDACTED LINK]

## Scripts

- Pre-demo safety and [REDACTED] briefing script [REDACTED LINK]
- [REDACTED] script [REDACTED LINK]

## Training

- General [REDACTED] talking points [REDACTED LINK]
- Training documents [REDACTED LINK]

## Visitor resources

[REDACTED] [REDACTED] [REDACTED LINK] Safety Briefing is a [REDACTED] safety overview YouTube video

## Other resources

- [REDACTED] platform overview wiki [REDACTED LINK] for info on platform names and IDs
- A sample demo agenda [REDACTED LINK]

## Slack Channels

- [REDACTED LINK] which is the [REDACTED] channel for scheduling demos. It is useful for referencing [REDACTED] & driver assignments
- [REDACTED LINK] channel for concise updates on the day of a demo. Multiple teams have access to this channel.
- [REDACTED LINK] for all active tickets with updates on [REDACTED]s or tag [REDACTED] with specific questions or instructions

## Reporting

- System integration provides a summary of disengagements per event [REDACTED LINK].
- Forensics has a dashboard that provides disengagement averages for demo [REDACTED LINK].

  **NOTES:**

  - IT can set up Okta access.
  - Ignore percent [REDACTED] as that cannot be calculated while excluding [REDACTED LINK]
