

PROPOSED PATIENT PHI OPTIONS WIZARD FLOWCHART

LEGEND

- ----- (dashed line) indicates the result of a decision
- — (solid lines) indicate what happens when the “Next>” button is clicked.
-  (gray box with text) indicates a question about the functionality
- () (parenthetical notes) are requests or ideas for the flow of the wizard
-  (text fields with arrows) indicate drop-down lists or date fields, etc.
-  (text boxes without arrows) indicate simple free-type text fields.

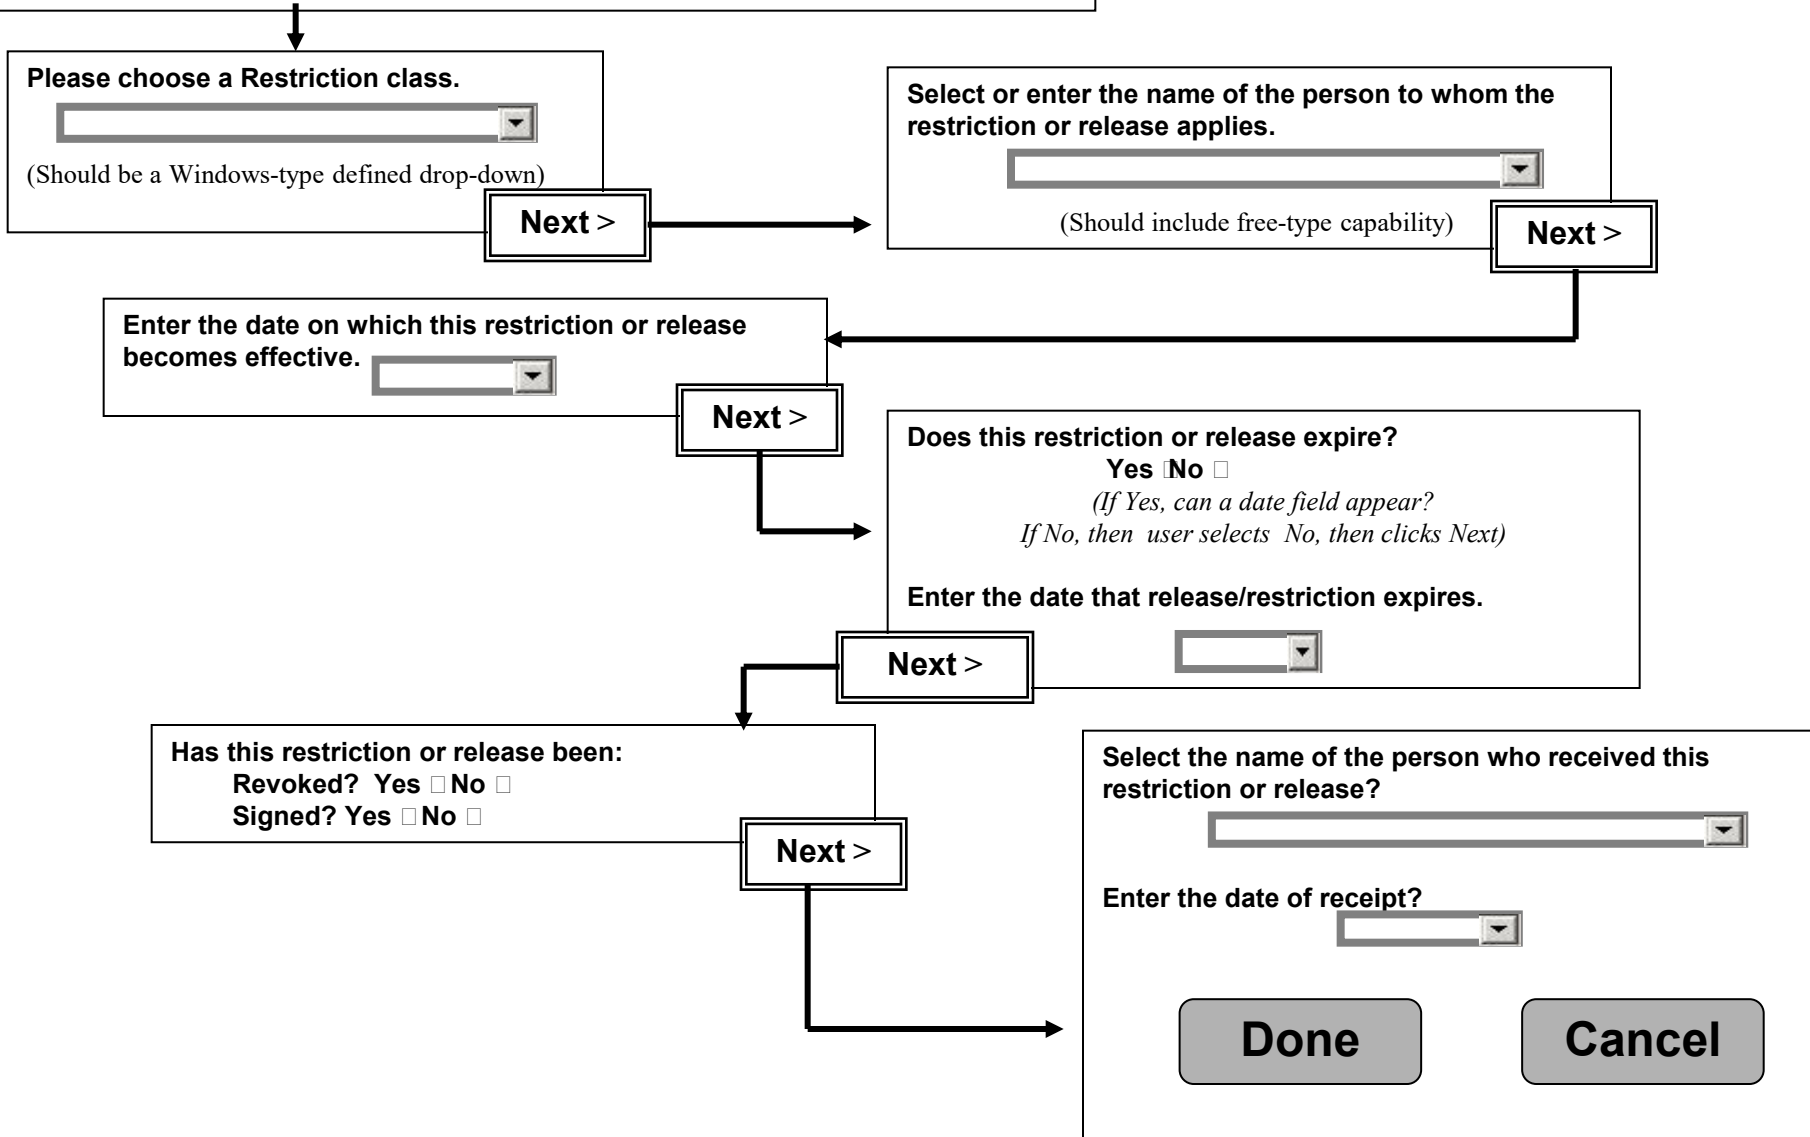

PATIENT PHI WIZARD

RESTRICTIONS AND RELEASES

Record who should and should not receive treatment-related information about this patient.

(It would be nice to have a definition for each one like this)

Wizard would close here and return to patient list.

DOCUMENTATION PROVIDED TO PATIENT

Track any/all documentation given to, signed by, and returned by this patient.

Select the type of document that was given to the patient.

(Should be a windows-type defined drop-down.)

Next >

Enter or select how this document was provided to the patient.

(Should be a windows-type defined drop-down.)

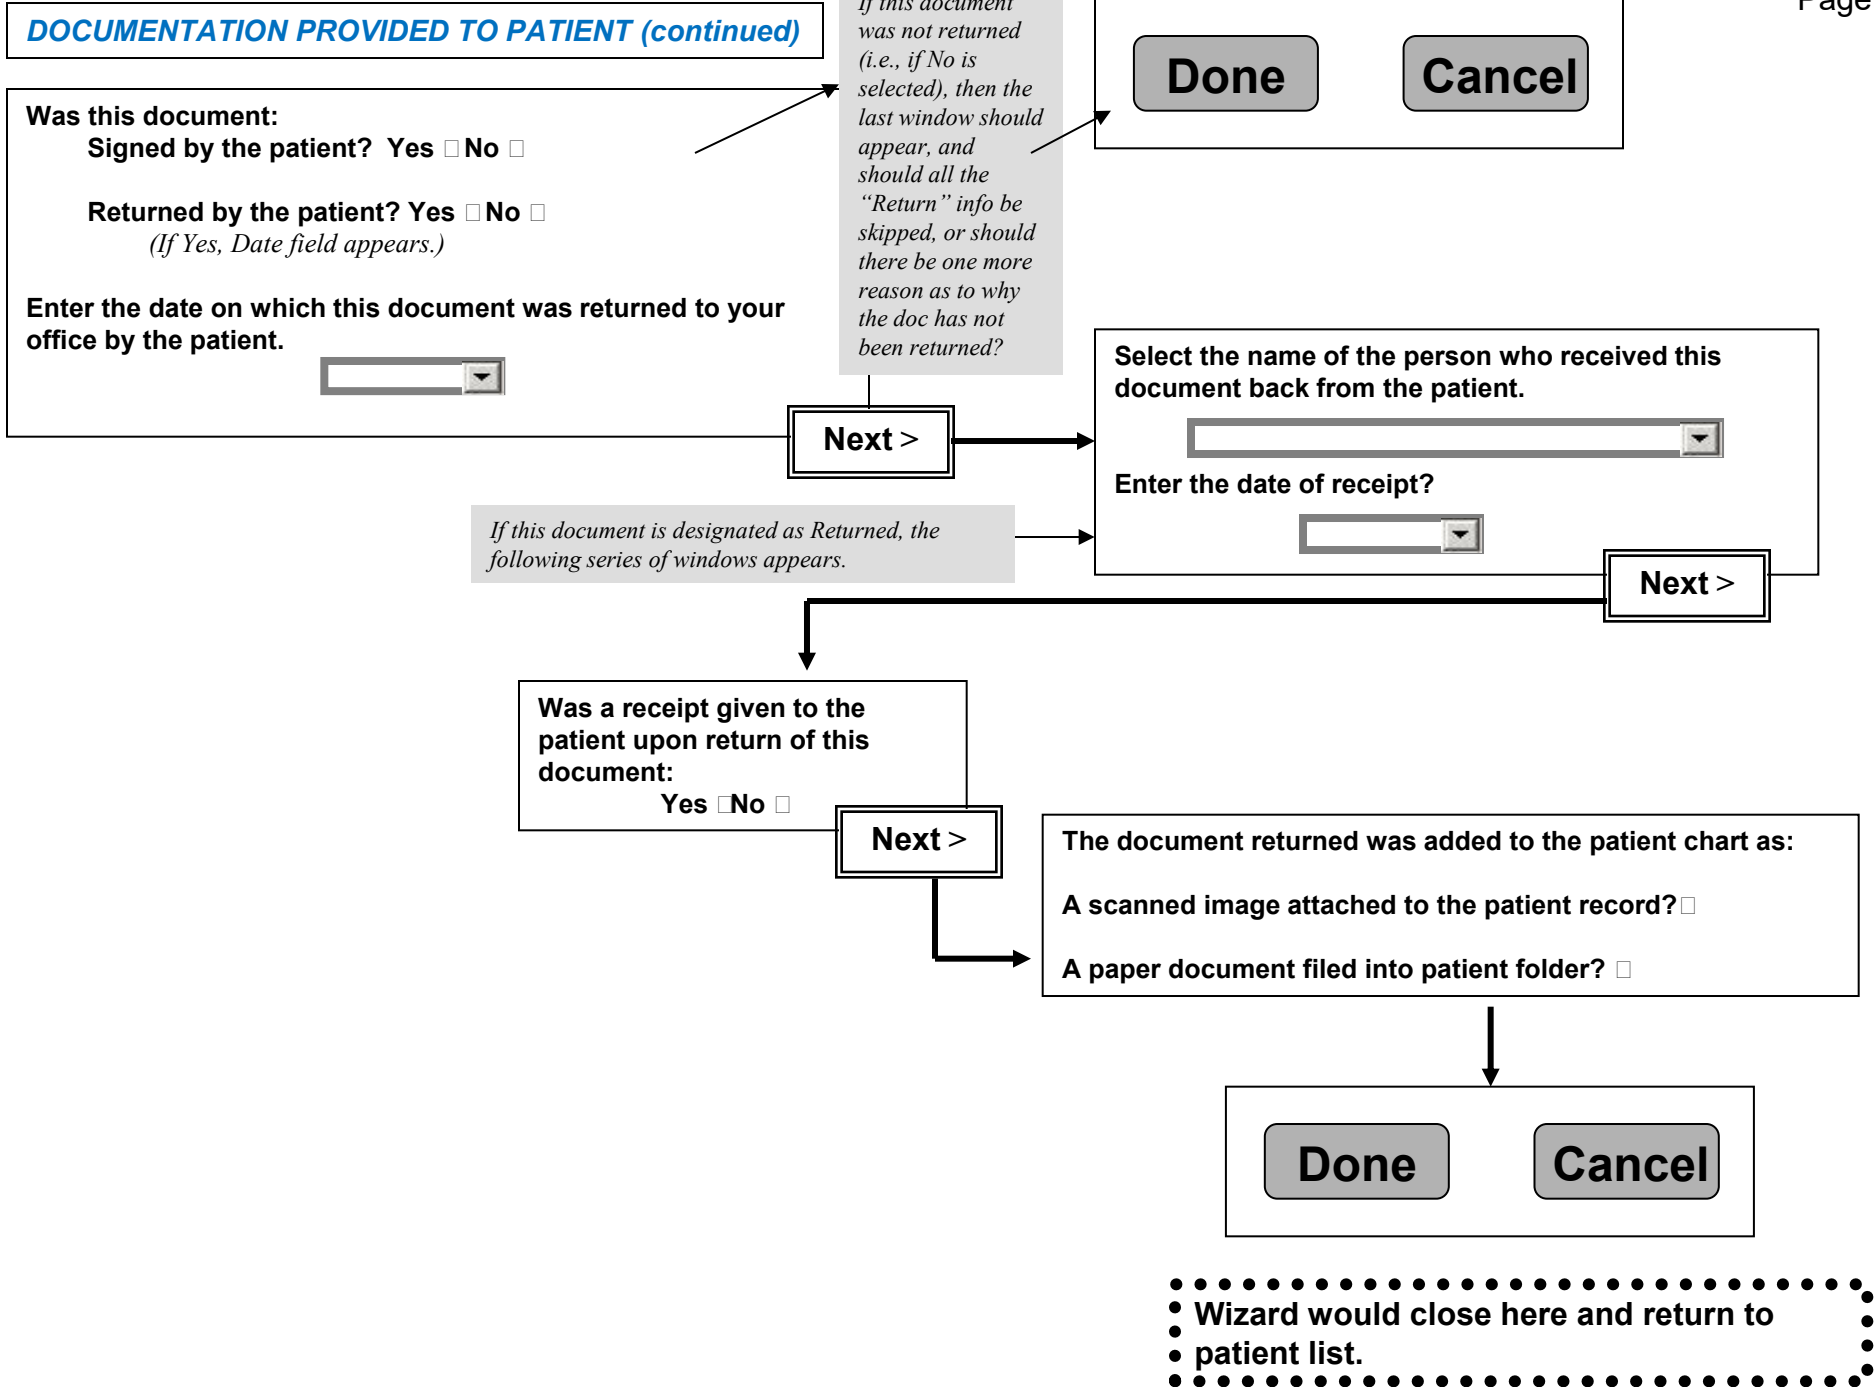

Next >

Select the name of the person who gave or sent the document to this patient

Enter the date of it was given/sent.

Next >

Go to page 5

DISCLOSURE REQUESTED/MADE

Record any disclosures for this patient's information that were requested or made.

Select or enter the type of disclosure that was requested.
