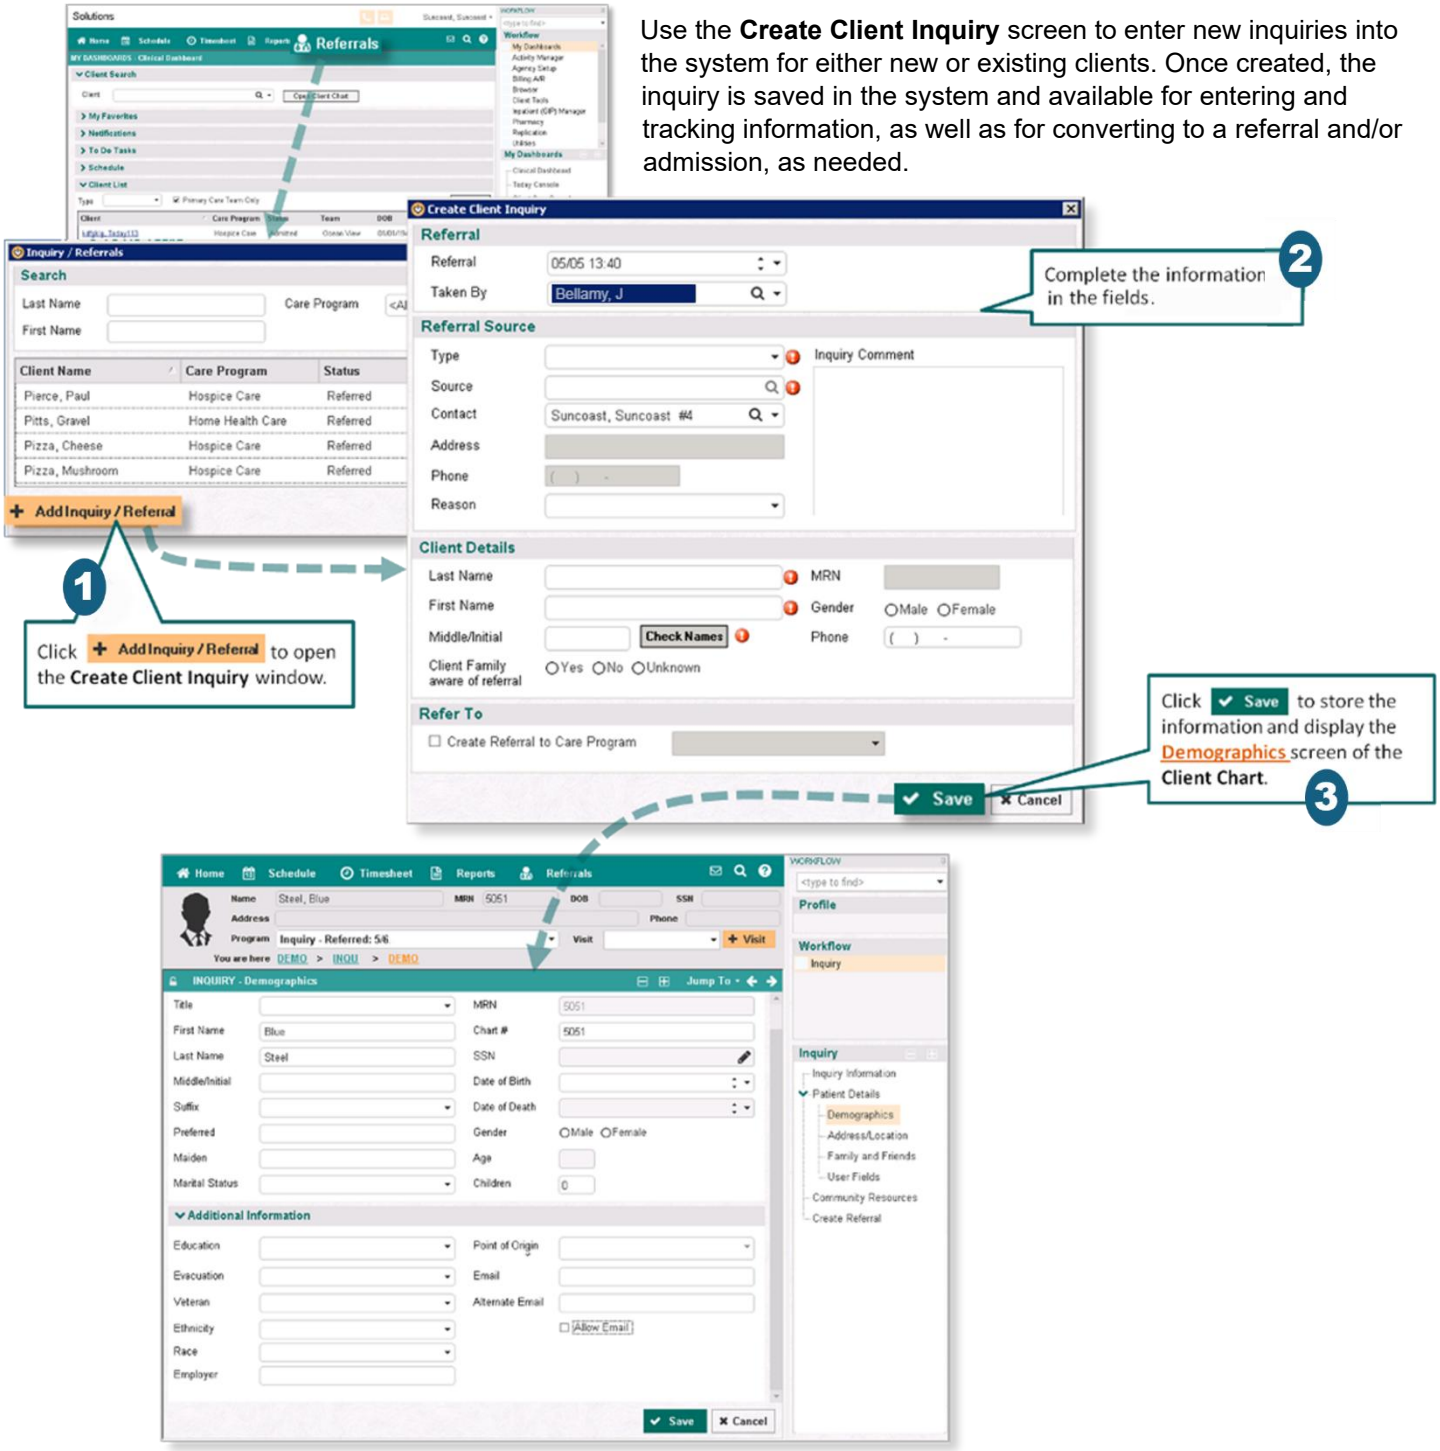
Quick Reference Guide
Create an Inquiry

This quick reference guide provides an overview for creating an Inquiry. In the PRODUCT NAME system, an Inquiry equates to the initial intake process completed for each client before they are referred to a Care Program.

Use the **Create Client Inquiry** screen to enter new inquiries into the system for either new or existing clients. Once created, the inquiry is saved in the system and available for entering and tracking information, as well as for converting to a referral and/or admission, as needed.



NOTE	*Until an Inquiry is converted to a Referral (that is, associated with a Care Program) it appears as "General Intake" in the Inquiry/Referral Client list.*
